Invade Dragon Valley To Find Ancient Lizards

WASHINGTON — What ho, you reluctant dragon! The Smithsonian institution is looking for a couple of the 120-million-year-old fossilized type.

Dr. C. L. Gazin, Smithsonian paleontologist who recently returned from military service, has left to re-explore Dragon canyon in Utah, where, just before the war, scientists found fossil bones of large long-clawed lizards.

Named "polyglyphanadons," these lizards were chums of the last of the dinosaurs. The Smithsonian adds conservatively "they were probably quite gruesome in appearance."

The Smithsonian says that while the lizards were among the most ancient members of the lizard family in North America, the fossil bones already found are so well-

After digging around in Dragon valley, Dr. Gazin plans further explorations for fossil remains of other animals in the Bridger basin of Wyoming.

Nature Helps to Avert Civil War in Iran

TEHRAN, IRAN. — Civil war in Iran may have been delayed or averted by unfavorable flying weather which blocked the departure of the Azerbaijan "premier" from Tehran recently, central government offic ials said.

They credited the delay as paving the way for a resumption of negotiations.

The "premier," Jafar Pishevari, agreed to reopen negotiations on the return of the self-proclaimed independent province of Azerbaijan to the central government's jurisdiction, according to a central government spokesman.

The Iranian army has been on the alert for the last few days and reinforcements have moved to certain frontier stations.

British Silk Industry Is in Serious Position

SCARBOROUGH. — Britain's silk industry is in a "serious position," L. Gaskell, a representative of the National Silk Workers association, said.

Gaskell told the General Federation of Trade Unions that British silk manufacturers were refusing thousands of pounds" worth of orders from North American and South American importers because of restrictions and taxes.

Many Cash Their 'E' Bonds

One-fourth of all the Series E savings bonds sold between May 1, 1941, and the end of 1945 had already been cashed by January 1, 1946, according to the 1946 Encyclopaedia Britannica Book of the Year. Sales of E bonds during this period were 51.7 billion dollars and redemptions were 9.6 billion dollars.

Individual purchases of E bonds, which were bought by two out of every three Americans, took up 20 billion dollars worth during the eight years. The peak numbers of sales to individuals was reached in the seventh loan, when 8.7 billion dollars was subscribed, a figure 24 per cent above the goal which had been set for individual sales.

U. S. Army Fights Nazi 'Baloney'

Occupation Troops Urged to Get Facts on Efforts to Feed Germany.

BERLIN—So he would not be obliged to "swallow baloney given him by complaining Germans but be able to answer back," each United States occupation soldier in Germany was urged by the army to arm himself with the facts on America's efforts to feed Germany and the world, says the Associated Press.

The army distributed among the troops an article by Dr. Carl F. Taeusch, former department of agriculture chief of the military government.

"It would be helpful to the military government in Germany," said the article, which contained statistics on food in Germany, "if you would regard yourself as a goodwill ambassador of the U. S. A. invested with powers of initiative in getting this story across to the German people. We have a firm policy, but it is human, and we have a record of achievement of which every American can well feel proud."

Tells the Story.

The article's distribution recalled a story in the army newspaper Stars and Stripes a few weeks ago which said that large sections of the German population were ignorant of America's food contributions and that many Germans believed the United States army was to a large extent living off the land.

The article, used by the army's information and education section in its courses for soldiers, said that in the 10 months from August, 1945, through May, 1946, American sources supplied more than 600,000 tons of food to help support the German civilian ration.

Of this, 57 per cent came from army stocks, 4 per cent from army excess subsistence, and 39 per cent from direct imports. Seventy per cent of the contribution consisted of wheat flour, cereals and biscuits. This, the article said, was 75 to 80 pounds of food for each German in the American occupied territory.

In addition, the United States is to boost German food production, supervised the importation of 37,000 tons of fertilizers, insecticides and other products for agriculture, the article added.

Anti-British Feeling.

Dr. Taeusch told the soldiers that neither "wet eyed sentiment nor a hard-boiled attitude toward the Germans" determined the military government's food policy. He said efforts first were made to "put it up to the Germans to maximize their own production and help make up the difference between home production and dietary needs."

Anti-British feeling is mounting in the Ruhr, encouraged by underground propaganda designed to split the Allies.

A senior military government officer here said the task of governing the area was becoming more difficult in view of mass criticism directed at the military government, which is being openly expressed.

Investigators discovered that anti-British feelings were fanned by the circulation of underground propaganda leaflets that implied that conditions, food and materials were more plentiful in the other zones.

Two Girls Hunt Flowers And Find Man Shot Dead

PRINCETON, N. J.—Two girls picking violets recently found the body of a former theater booking agent, shot through the head and dumped beside the Delaware and Raritan canal in nearby Lawrence township.

State police detective Claude Patterson identified him as Thomas Madeo, 40, of Brooklyn, N. Y., discharged from the army last November. A physician said he had been dead about 10 hours.

Patterson said Madeo apparently had died elsewhere and had been brought to Lawrence township. His body was found by Helen Borodeff, 15, and Janet Hawkins, 12.

Health Is Deteriorating In British Zone Cities

HERFORD, GERMANY. — A marked deterioration in the health of city dwellers in the British zone of Germany was reported in a British military government statement recently. Reports from all urban regions of the British zone, the statement said, show signs of increased loss of weight and increased hospitalization, absenteeism and lowered resistance to disease. Signs of starvation were not noticeable in rural districts, where the population suffers little from lack of food, the reports said.

British Police Renew Search for 'Dead' Bose

LONDON. — Calcutta news dispatches report Scotland Yard and Indian police authorities are maintaining vigilant watch along the entire Indo-Burma border in a possible effort to capture Subhas Chandra Bose, former leader of a Japanese-sponsored Free India movement, Exchange Telegraph agency said.

Bose was reported to have been killed in an airplane crash.

Colored Dots

Revival for the Prese Land Baptist Church starts Sunday, August 25, with all-day services. Services conducted by Dr. R. L. Thomas, former pastor. Memorial for deceased members in afternoon.
—Rev. J. S. Carter, pastor.

Frazell Thomas and Mrs. Lucy Thomas, of Philadelphia, neice of C. M. Harvey; also Mrs. Alice Coleman, sister of C. M. Harvey, spent their two-week vacation with Mr. and Mrs. C. M. Harvey, of Appomatox, Va.

NEGRO EXTENS ON NEWS

The names listed below are those people who agreed to use their farms, pas ure, field and garden [illegible] demonstration areas for [illegible] visit, the homes of those mentioned and observe the progress being made. An outdoor storage house is now under construction on the farm of Colonel Walker of Hixburg community, and is nearing completion. It was accepted as a community project and neighbors met and took part in the actual construction. Another demonstration will be the building of a laying house on the farm of Sam Jones, of Hixburg community.

Corn hybrid demonstrations:

Varieties used: US 12 111,448, US 257 - yellow varieties preferred in county. The plots listed below as demonstrations will be posted with the official Extension Service posters, stating that they are demonstrations.

(1) Demonstrator, G. M. Lee,Concord, Va. Stonewall community farm unit demonstrator. Planting 10 acres of US 13, which follows lespedeza sowing 300 lbs. of 3-12 6 complete fertilizer to the acre. This farmer also planting for the first time 4 1-2 acres of silage corn which will be cured in cheap silo (to be constructed this fall).

(2) Lloyd Foster, Rt. 3, Appomattox, Va.- Planting 8 acres of US 257, which follows 3 acres new ground; same sowing 300 lbs. of 4-12-4 complete fertilizer.

(3) Charles Marshall, Route 3, Appomattox, Va. Planting 5 acres US 13, which follows old meadow and some new ground; same sowing limed 2 tons per acre, sowing 300 lbs of 4-12-4 complete fertilizer.

(4) Isaac Patterson, Appomattox Va.-Planting 6 acres US 13,which follows excellent lespedeza stand. Manure application 5 tons per acre; sowing 3-12-6 fertilizer at rate of 400 lbs; also to be treated with 200 lbs. of two applications of nitrate of soda.

Colonel Walker, Rt. 2, Pamplin, Hixburg community. Planting 1 1-2 acres US 257, follows hay meadow; (strip cropping methods used on this farm) sowing 250 lbs. 4-12-4 fertilizer.

Rosser Edwards, Rt. 1, Pamplin, Pamplin community. Planting 7 acres US 257, follows clover,sowing 300 lbs. 3-12-6 fertilizer.

G. L. James, Appomattox Va. Planting 1-4 acre US 257 and US 13; follows rich former garden plot; sowing 400 lbs. 3-12-6 fertilizer to be sidedressed with two applications of nitrate of soda at rate of 200 lbs. to acre. Planted for close observation on growth, diseases, comparison, and yield.

Mace Lewis, Rt. 2, Ages community - 8 acres of new pasture, consists of new ground and old pasture. Plowed up and limed 2 tons per acre; sowed 250 lbs. 4-12-4 fertilizer per acre,seeded with grain drill. Seed mixture (Red top 3 lbs., Meadow fescue 12 lbs., Alsike clover 3 lbs., Korean lespedeza 8 lbs., Rye 10 lbs.) This mixture was recommended for wet bottom and, for this pasture is located on bottom land near a frequently over-flowing large stream.

Percy Pankey, Rt. 2. Towerhill community. (Intends to seed down entire farm in pasture and hay. Plans to start herd of pure-bred Angus beef cattle.)

Isaac Patterson, Appomattox. 10 acres pasture in excellent condition. Grazes 16 head on switch plan with another 12 acre woodland and new ground supplementary pasture.

Sam Jones, Rt. 1, Pamplin. 1-4 acre of old pasture applied to measured off section for demonstrating treatment and non-treatment,with 300 lbs 3-12-6 fertilizer.

Charlie Marshall, Rt. 1, Appomattox. 2 beds 100 sq. yds. each, one to be treated, other not.

Garden Project Demonstrations:

Mrs. Van Patterson, Mrs. Theresa Hamlet, General Stevens, John Tibbs.

Livestock Project Demonstration: Percy Pankey, Rt. 2.

Poultry Project Demonstration: G. M. Lee, Concord, Va.

(Note: We regret that limits of available space forced us to condense descriptions of some of the demonstration activities.)

Dr. Miller resigns as the dean of W. and M.

Farm Topics

New Hormone Weed Killer Effective

2, 4-D Will Not Kill All Troublesome Weeds

Farm losses from weeds exceed those from all other causes. With the development of 2,4-d, and organic acid 2,4-dichlorophenoxyacetic acid), by the USDA and the New York agricultural experiment station, farmers will be saved millions of dollars annually.

[illegible] the growth mechanism of the plant and

Kudzu responds to 2,4-D treatment.

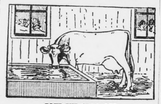
travels some distance through the plant to induce changes which cause death.

Recent experiments determined that solutions containing from 10 to .15 of 1 per cent were sufficient to kill dandelion, common plantain, buckhorn, chickweed and pennywort.

The cost has been reduced to such an extent that for from $4 to $6 it is possible to clean up an acre of land.

With some weeds like Canada thistle, 2,4-D has not proven effective in killing the roots. It has been successful with bitterweed, bindweed, wild mustard, wild radish, bull thistle, chickweed, ragweed, goldenrod, burdock and many others including such shrubs and vines as choke cherry, wild honeysuckle, wild grape, locust, Virginia creeper, sumac and poison ivy.

Take Off Water Chill



TAKE THE CHILL OFF

Many gallons of milk are lost by the average cow due to being forced to drink ice cold water. It is not too early to make plans for removing the chill from water. New type electric de-icers on the market have proven satisfactory. Local costs should determine the type to be used.

Roanoke now in lead in Piedmont League.

Spout Spring

Spout Spring, August 20.- Mr. and Mrs. George Carson and daughters, Frances and Harriette, spent Sunday in the home of her parents, Mr. and Mrs. W. J. Watson.

Mr. and Mrs. A. W. Dean, of Lynchburg spent Sunday with her parents, Mr. and Mrs. Arthur Almond.

Mr. and Mrs. Roy Moon, of Radford, Va., are visiting his parents, Mr. and Mrs. W. A. Moon.

Miss Louise Walton, of Appomattox spent Sunday night with her sister, Mrs. George Carson.

Mr. and Mrs. T. B. Collins, of Portsmouth, Va., visited relatives here recently.

Miss Helen Marks and "Sonny" Marks spent several days last week in the home of Mr. and Mrs. W. A. Moon.

The United States averaged 575 forest and woods and range fires every day during pre-war years.

Close to three-fourths of all the commercially valuable forest land in the United States is in private ownership, and farmers own one-third of it.

Softer peace terms for Italy rejected.

State Legion convention asks U. S. remain military power.

Yugoslavs fire on American Army transport.

Expect coal to be scarce again this winter.

Vera

Vera, Aug. 20.- Mrs. Edith Watson, of New Jersey is visiting in the home of her son, L. N. Watson.

Mrs. Maude Abbitt, Mrs. Leslie Turnes and Mr., and Mrs. Robert Coleman were visiting Mr.and Mrs. T. C. Harvey Sunday.

Mr. and Mrs. T. J. Harvey, of Richmond spent the week-end with Mr. and Mrs. T. C. Harvey.

His neighborhood was saddened by the death of J. Holcomb Woodson.

How women are may get wanted from functional period

Cardui is a liquid medicine that women say has helped them relieve the symptoms of their functional monthly distress. Here's how it may help:

1 Takes before distress starts, it should relieve pain, increase appetite, help build resistance.

2 Started in time, it should help relieve pain due to functional period distress.

Try Cardui. If it doesn't help you, consult a physician.

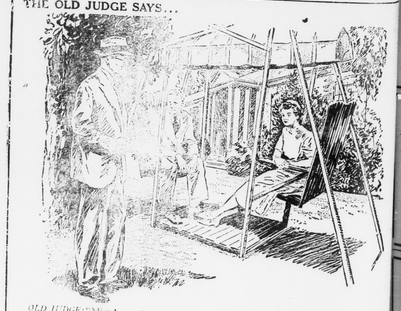
THE OLD JUDGE SAYS...



OLD JUDGE: "Miss Ames, that was a very interesting talk you gave last night at the association meeting."

NURSE: "Thank you, Judge. I only hope we can raise the money we need for the alcoholic ward."

OLD JUDGE: "I don't think there is any question about it. Everybody I talked to was very much impressed. It has taken a long time, but more and more people are realizing now that alcoholism is a health problem and not a moral problem."

DOCTOR: "I think you're right, Judge, but don't forget that it was fairly recently that medical men and scientists discovered that alcoholic is really a sick man. It has been only in the last ten years that folks found out that most alcoholics suffer from some deep-rooted mental or physical condition that causes their abnormal drinking habits."

OLD JUDGE: "Well, I don't think it will take very long now to get the facilities you need here for enlightened treatment. After last night's meeting I found a lot of people have changed their viewpoint about how to deal with the problem drinker."

Oakville

Oakville, Aug. 20.- Mr. and Mrs. G. Watts and son, of Monroe, Mrs. Frances St. Clair and children, Beverly and Jerry, Mr. and Mrs. Terry Mr. and Mrs. Coleman and Mrs. Lillian Hawley were the guests of Mr. and Mrs. Emily Gehrauch and Mrs. Betty Moore, of Lynchburg visited in the home of Mr. and Mrs. C. E. Wilkerson and Jerry Mr. and Mrs. C. B. Page last week-end and Beverly St. Clair remained for a week's visit.

Mr. and Mrs. Coleman Moore and Mrs. Terry Rogers spent last Thursday in Richmond.

Mr. and Mrs. Len Childers and grandson, Len Raymond, Littleton Lucado, and Edd Childers spent last Sunday with Mr. and Mrs. Jim Childers.

Mr. and Mrs. Earl Wilkerson, of Lynchburg visited in the home of Mr. and Mrs. C. E. Wilkerson and Jerry Mr. and Mrs. C. B. Page last week-end.

Mrs. J. E. Marsh, Mr. and Mrs. Bowen, Mr. and Mrs. Ferrell, of Halifax and Mrs. A. E. Jones were guests of Mr. and Mrs. Edmund Hillsman at Appomattox Sunday.

Mrs. Bob Wells and children, Mrs. Eugene Dunkley and children, Albert Page, of Farmville, Percy Page, of Lynchburg, visited in the home of Mr. and Mrs. T. L. Page Sunday.

Mrs. Samuel Lee Page and daughter, Norma Jean are visiting relatives in Richmond this week.

The !Oakville Home Demonstration Club held a social at the school last Friday evening. It was an enjoyable occasion and well attended by members and their friends.

Mrs. T. L. Page and Mrs. W. C. Bass were called to Rockbridge recently because of the death of their brother-in-law, John Pugh.

Mrs. Wiley Moore is visiting relatives in Amherst this week.

Misses Ilene and Dot Moore and a friend, all of Norfolk, spent last week-end in the home of Mr. and Mrs. Clarence Moore.

A miscellaneous shower was given in honor of Mr. and Mrs. Coleman Moore at the home of his parents, Mr. and Mrs. Clarence Moore last Saturday evening. The many guests enjoyed the evening, and many lovely and useful gifts were received by the honorees.

The Red Oak B. T. U. has planned a social at Holliday Lake Saturday afternoon, this week-end.

Mr. and Mrs. F. H. Hawley and daughter, Lillian spent last week-end in the home of Mr. and Mrs. R. E. Smith.

Mr. and Mrs. Taylor Coleman and daughter, Mr. and Mrs. William Borcher and daughter, and Mrs. Bessie Cobb and daughter visited Mr. and Mrs. Lincoln Martin at Madison Heights, Va. Mr. and Mrs. Martin are the proud parents of a baby boy, born July 27th.

Mrs. Irene Rogers, who has been staying with her sisters in Richmond, visited in the home of Mr. and Mrs. Clarence Moore last week-end, returning Sunday.

War on Cancer Gets New Urge

German Secret Microscope Offers Another Attack On Dread Disease.

COLUMBUS, OHIO—Hopes of a new attack on cancer are given Veterans' administration doctors in the discovery of a 19-year-old Nazi secret in bomb-wrecked laboratories in Jena, Germany, says the United Press.

The secret was a little-known German "phase" microscope that was found among the ruins by an American army colonel, Arthur T. Brice.

Brice, former V.A. medical technical expert, brought the microscope back to this country along with motion-picture films of cell growth taken through the instrument.

V.A. officials here explained that the motion picture was significant because it showed the mysterious processes of the microscopic world of living cells "better than ever before" in medical history.

The instrument gives scientists their first clear view of how living cells subdivide and multiply.

Cells Multiply.

The chief characteristic of cancer cells is their unbridled multiplication, officials explained. The cells themselves and their pattern, or life, are different from normal body cells as far as anyone yet has been able to prove, they said.

If some fundamental difference could be proven between the life processes of cancer cells and other cells, they said, "a new method of attack on cancer might eventually result."

The living substance that Colonel Brice presented in motion pictures consisted of the sperm cells of a grasshopper. Their life was recorded on 16 mm. film.

Time was telescoped so that the evolution of 24 hours was flashed on the screen in a matter of minutes.

The "phase microscope" involves the complicated field of light waves.

Overlaps Light Rays.

The instrument overlaps light waves to defeat transparency without in any way interfering with the normal aspects of the object viewed.

It looks like an ordinary microscope except that between the light bulb and the stage on which the specimens are placed there is inserted an arrangement of discs and slits that overlaps the light rays.

Before the Nazi instrument was uncovered scientists had been able to study cells microscopically only by employing color to overcome transparency.

But this stain often killed the cell and always left a question of how much it affected their normal processes, officials explained.

County Democratic mass meeting called for August 31.

Play safe - drive carefully.

Victorian Charm

A candy-striped dinner gown that's as sweet as candy is this Victorian inspired dress. The taffeta is multi-colored. Bustle puffs emphasize the wasp-waist.

Prolific Sows Pay Better

One prolific sow, with enough udder sections and milking ability to raise 10 or more pigs, can produce litters with as much weaning weight as three average sows. Such records were found in the Michigan Sow Testing project, conducted in 1945 by H. F. Moxley, Michigan State college extension animal husbandry specialist.

Records on 139 sows show the 10 high sows produced as much pig weight at 56 days as the 30 low producers. Similar results were recorded by G. P. Deyoe for 120 sows in Vocational Agriculture projects in Michigan.

Danger From Rabid Dogs

Rabies is a year-round problem. But rabies may be worse in the summer months because dogs are running about more. With the improvement in vaccines in recent years, livestock sanitary authorities last year put their stamp of approval on vaccination. They emphasize, however, that vaccines do not give full control — that other control measures are still important—especially rounding up stray dogs. Rabies takes a big toll of human and animal life every year.
